

ZEPTO SALES DASHBOARD USING MICROSOFT EXCEL

Project Report

Project Overview

The Zepto Sales Dashboard is an interactive business intelligence dashboard built in Microsoft Excel. It analyzes sales, customer behavior, delivery performance and product categories using Pivot Tables, Pivot Charts, KPI cards and slicers.

Objectives

- Analyze overall sales performance.
- Monitor sales, quantity, discount and delivery time.
- Identify top customers and products.
- Compare city-wise and category-wise sales.
- Support data-driven decision making.

Dataset Information

Item	Details
Dataset	Zepto Sales Dataset
Records	Approx. 1,500
Columns	16
Domain	Quick Commerce / Grocery Retail
Cities	Bangalore, Delhi, Mumbai
Customer Types	New, Bulk, Returning

Data Cleaning & Dashboard Features

- Removed duplicate records.
- Handled missing values.
- Validated sales-related fields.
- Created Pivot Tables and Pivot Charts.
- Added KPI cards and slicers.

Key KPIs

KPI	Value
Total Sales	■563,284.75
Total Quantity	1,499
